National Pollutant Discharge Elimination System (NPDES) Notice
The National Pollutant Discharge Elimination System (NPDES) is a regulatory program administered by the United States Environmental Protection Agency that calls for the control and management of storm water pollution. In Hawaii, our storm water drainage systems were designed to prevent flooding by channeling storm water into drains that discharge through outlets along the coastline.
However, the storm water drainage systems were not designed for the disposal of waste or pollutants. In order to protect the environment and fulfill our pollution prevention (P2) responsibilities, the Department of Education must implement best management practices (BMPs) as part of a storm water management plan (SWMP).
The undersigned understands that every effort should be made to prevent pollution as a consequence of using school facilities. Waste and pollution if not curtailed will enter storm drains and eventually make its way to the ocean. Organizers and participants can help by preventing litter and minimizing the use of autos on campus by carpooling, riding bikes, and using public transportation. Report any illegal dumping and observed violations s by calling the City Illegal Dumping Hotline at 768-3300 (Honolulu) or the respective county offices (neighbor islands).
